

SERELLA Consulting LLC Partners with Hostway to Offer Industry-Leading Cloud and Managed Hosting

Hostway's Award-Winning Platform Delivers Affordable, Flexible, and Reliable IaaS for Shared and Private Hosting Needs

Hartford, CT November 17th 2011 — SERELLA Consulting today announced a new partnership with [Hostway Corporation](#), a global leader in infrastructure and cloud services, that will allow SERELLA to offer its customers Hostway's award-winning suite of [cloud](#) and [managed hosting](#) solutions.

Delivering enterprise-grade reliability and security, Hostway's platform of cloud-based solutions provide mission-critical IT infrastructure with minimal IT management burden for web hosting, virtual private servers and scalable multiple server environments. Designed to meet virtually any Infrastructure-as-a-Service (IaaS) need, Hostway solutions are ideal for anything from basic small business website hosting to feature-rich, root-access-level control with instant deployment and scalability on demand. Hostway's managed hosting solutions provide high-availability IT infrastructure backed by a 100% network uptime SLA and 24/7 live technical support from dedicated representatives.

"Partnering with Hostway sparks a great competitive advantage for our company, as well as for our clients," said Hikmet Tekce, founder and managing director of SERELLA Consulting. "SERELLA Consulting is an international management company that provides technology solutions to domestic and international clients. Our partnership with Hostway enables us to help our clients by providing them cost-effective, scalable, on-demand cloud infrastructures."

Dedicated to global growth and expansion, Hostway boasts 11 state-of-the-art Tier 1 data centers around the world and gives customers their choice of datacenter location to enhance performance and minimize latency. Its managed hosting and dedicated server solutions are available month-to-month with no annual contract to meet every customer's need for flexibility and affordability. Every package includes a 100 Mbps port delivering 50 GB FTP space and 2000 GB bandwidth.
